

AVALON DEVELOPMENT CORP.

PROSPECT 2012-1

Commodities: Gold and silver

Access: Tidewater, limited roads

Infrastructure: Close to regional infrastructure

History: +100,000 oz gold produced, 17 historic prospects over +10 km, no work for last 20+ years, no modern exploration and no drilling conducted in the district

Resources: None

Geology: Metamorphosed slate and greenstone, minor younger intrusives, regional structures appear to control mineralization

Mineralization: Structurally controlled greenstone hosted high-grade mesothermal gold mineralization in veins, sheeted veins and stockwork zones.

Recent Exploration: Most recent exploration dates to 1988, 2.4 meters grading 80.42 gpt Au.

Land and Competitors: Open to mineral entry, no active claims in the district
